MDsimulation LTD

Explanation & Service → Increase case acceptance on treatment proposal  
Closing the gap between expectation and final result → Increase case Success

“We are proud to announce that DentalMaster provided its system for one of the first studies done to evaluate

**Unique 3D artificial intelligence** in treatment planning  
– or a light speed animated treatment planning tool

Time management is of essence. in modern dentistry.

Some testimonies

#### Conflict of interest and source of funding statement

The authors declare that they have no conflict of interest. This study was supported by MD simulation (Israel) by providing DentalMaster 3D animations.

DentalMaster is la "crème de la crème".  
Trust me!

**Pr Bernard TOUATI, France**

Here are a few words describing my thoughts on DentalMaster

"I have been collaborating with MDSimulation and Mr. Serge Goldstein in the past 10 years. I had the privilege of using both the personal assistant and the 3D software with high satisfaction. I truly think the quality and creativity of the DentalMaster team is something to be proud of".

**Prof Ziv Mazor, Israel**

The software is a great patient communication tool. The amazing quality animations can make patients understand clearly the various procedures involved in their treatment and answer most of their questions. This impressive visual experience can lead to an increased rate of treatment acceptance by the patient. Definitely recommend it!

**Dr. Dinos Kountouras BDS MSc PhD**  
Thessaloniki, Greece

To whom it might concern,

I am a dentist specialized in implant dentistry and oral surgery and since I am using the Dental Master software, I increased my treatment plan's. All those applications make this product a fantastic tool for my practice.

**Dr Jonatan Beley**

Chirurgien-Dentiste

Dear serge

I would like to confirm the Expert program is exceptional for the student education and also for patient information.

**Pr Patrick Missika**

Vice Dean  
Head of implantology Dep. University Paris Diderot, Garanciere

"Serge and DentalMaster have been pioneers in video graphics and some of the best animation has come from their company. We look forward to working with their new software and helping to make it even better for patient communication."

**Dr. Ronald E. Goldstein, DDS USA**

The 3D expert is the only planning software that gives the patient the feeling that he is looking at his own mouth... It's unique and it makes a big difference for case acceptance.

**Dr Philippe Russe, France**

A software that is extensively utilised by leading lecturers at prestigious global dental conferences cannot be ignored. The DentalMaster 3D allows visualisation of clinical procedures for educating not only fellow colleagues, but staff and patients, and therefore increasing treatment plan acceptance. I recommend this invaluable software to any clinician seeking to elevate their dentistry to the next level.

**Dr Irfan Ahmad England**

DentalMagic

## DentalMagic

Logiciel surprenant et étonnant pour le traitement numérique de vos photos : l'outil le plus facile et aussi le plus précis pour traiter le profil digital de votre patient. En seulement quelques clics, vous pouvez créer : non seulement le CONTOUR des dents, mais aussi fermer des espaces inter-dentaire, reproduire des dents manquantes, mesurer les dents pour les reproduire dans les dimensions désirées et plus encore. Avec ce procédé d'imagerie numérique facile et précis, vous pourrez modifier les photographies numériques de votre patient

Vous aide à créer un vrai dossier avant/après des photos de votre patient

Votre équipe et vous apprécierez l'emploi du DentalMagic grâce à sa convivialité et les résultats extrêmement frappants et probants visuellement .

Pour faciliter vos présentations, DentalMagic vous permet de copier et coller de Keynote ou PowerPoint directement du logiciel lui-même (avec Mac en utilisant Parallel & Windows)

Quelques caractéristiques :

- Sauvegarde de la partie sélectionnée de la photo
- Sélectionner sur la photo l'endroit que vous voulez utiliser ou remplacer ou insérer ou même si besoin est d'importer certains graphiques ou photos d'une source autre (ex : set de dents)
- Montrer Avant/Après et sauvegarder la photo morphing

# Services Graphiques

## Implant Threads

### Design Features:

- Double thread design 2X2.1mm
- Wide thread step
- Threads increase in the apical direction
- Variable threads design:
  - Coronal – thick square threads
  - Middle – thinner square threads
  - Apical – V threads

The coronal threads condense the bone of the apical threads

### Advantages:

- Easy insertion
- High primary stability
- Bone condensing
- Self tapping
- Primary stabilization
- Easy insertion

Early wound healing in bone with T5.1™ is characterized by its osteoconductive properties. The latter means that bone is formed and deposited by contact osteogenesis directly on as well as along the rough, porous surface. The second image 2 shows osteoblasts at the front of bone formation starting to secrete collagen matrix, the organic compound of bone. Doing so, they move away from the surface leaving behind the so-called osteoid (collagen matrix meshwork) which then becomes mineralized and so woven bone is formed.
